Art Unit: 1731

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 12,13 and 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kriegsmann et al. (6,228,283) in view of Ohno et al. (4,284,431) for the reasons as set forth in the previous office action.

4. Applicant's arguments filed April 8, 2003 have been fully considered but they are not persuasive.

**With respect to the rejection under 35 U.S.C. 103(a) over Kriegsmann et al. (6,228,283) in view of Ohno et al. (4,284,431) applicants argue:**

**Claim 12 recites a method for producing a high-purity silicon carbide sintered body. Kriegsmann and Ohno do not teach or suggest such a method. Kriegsmann produces a**

**sintered body containing embedded mixed fibers. Accordingly, Kriegsmann does not teach or suggest the production of a high purity silicon carbide sintered body as claimed.**

This argument is not persuasive. Independent claim 12 does not require the production of a "high-purity" silicon carbide sintered body. Thus, these arguments are not commensurate in scope with the claims. Further, the claim uses the term "comprising" and thus encompasses open claim language that is inclusive of the addition of other materials such as reinforcing fibers.

5. Claims 14,15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
